SETTING THE STAGE

Global Progress and Challenges

Despite progress, the world is not on track to meet the Paris Agreement and the Sustainable Development Goals, with global thresholds for a "safe and just" planet already breached.

Tension Between Growth and Sustainability

The tension between growth and sustainability goals is acknowledged as a significant challenge that cannot be ignored, urging the need to address this issue transparently.

Urgent Transformation Needed

Achieving targets requires urgent business transformation and innovation beyond existing strategies, emphasizing long-term societal and economic resilience.

Envisioning a Better Future

Participants engaged in a workshop envisioning the future of their industries operating within planetary boundaries and mapping actionable pathways to get there.

Struggles with Climate Goals

Many companies express difficulty maintaining trajectories toward climate goals, with reports indicating challenges in meeting net zero goals despite initial commitments.

"One year ago, this topic was taboo. Today, we don't have the choice, we have to create the solutions."
— Isabelle Lefort, Co-Founder, Paris Good Fashion

LEARN MORE

BSR's "Beyond Growth" event series emerged from conversations between our members and BSR staff on the continuing challenge to achieve meaningful progress on net-zero targets and the 2030 SDGs in a business environment based on extraction and unlimited growth objectives.

Set in that context, and in the wake of scientific analysis

Working with Business to Create a Just and Sustainable World

A hand holding a black marker is writing on a sticky note on a table. The table is covered with several other sticky notes, some of which have handwritten text. The background is a soft, out-of-focus red. The overall scene suggests a collaborative meeting or workshop.

THANK YOU

An immense thank you to our panelists and participants for venturing 'Beyond Growth' with us. **This is just the beginning.**
