

# Green Freight Asia

Green Freight Asia is an industry-led network focused on driving sustainable road freight in the Asia Pacific region to ultimately improve fuel efficiency, reduce CO<sub>2</sub>e emissions and lower logistics costs across the entire supply chain.

## Our Vision

The vision behind the GFA Label is to create a green ecosystem whereby shippers can make a conscious, 'green' sourcing decision by selecting a carrier based on its GFA Label rankings.

## Our Mission

Our key objective is to help lower fuel consumption across Asia-Pacific sourced road freight movements, reduce CO<sub>2</sub>e emissions from these movements and lower shipping costs across the entire supply chain.

## How We Work

- Successfully applying for the GFA Label is the first step for freight carriers and shippers in officially gaining their green credentials.
- GFA will also further support the sharing of sustainability road freight practices to help companies to learn from them and to adopt them.
- In order to ensure neutrality and compliance with data security and competition compliance aspects, GFA has engaged neutral Label assessment partners, TÜV SÜD, TÜV Rheinland, and BSR.

# Why Join?

**1** Provides a simple and clear definition and recognition of Green Road Freight Transport.

**2** Aligns the definition and recognition of Green Road Freight Transport across countries in Asia-Pacific and other regions.

**3** Facilitates information sharing about Green Technologies.

**4** Tracks positive impact of Green practices on fuel consumption and CO<sub>2</sub>e emissions in a measurable way for its members.
