

# Industrials and Utilities

The industrials and utilities industries are leading the development of sustainable materials, low-carbon and renewable technologies, and resilient and smart infrastructure to meet growing global needs. At the same time, industrial and utility supply chains, operations, and products face growing sustainability expectations from investors, governments, and other stakeholders.

## COMPANIES

Brookfield Renewable Partners  
The Dow Chemical Company  
ENEL SPA

Vinci

## How We Work

BSR works with industrial and utility companies at both the corporate and asset levels across environmental, social, and governance issues. Within the industry, we are a global leader in developing sustainability strategies, managing stakeholder engagements, promoting human rights, and ensuring sustainable supply chains. In addition, we foster several large-scale and high-impact collaborations between our industry members and their corporate clients.

## Our Focus

- Climate resilience
- Corporate collaborations
- Corporate responsibility governance
- Customer and market engagement
- Global strategy and local engagement
- Human rights
- Renewable energy
- Reporting and transparency
- Sustainable supply chains
